Skills

- WordPress Theme Development
- Wordpress Plugin Development
- PHP
- Javascript
- HTML5, CSS3
- MySQL
- REST API
- SEO Basics

Projects

Custom WordPress Blog Theme | *PHP, HTML, CSS, JavaScript*

- * Built reusable WordPress template files (index.php, single.php, archive.php, header.php, footer.php, etc.) to ensure modularity and easy maintenance.
- * Integrated WordPress Loop to dynamically display blog posts and content from the WordPress backend.
- * Applied custom styling and responsiveness using CSS and media queries for a mobile-first design.
- * Added support for theme customization options using functions.php and the WordPress Customizer API.

WordPress Contact Form Plugin | *PHP, HTML, CSS, JavaScript*

- * Built form fields with support for name, email, message, and custom validation using both frontend (JavaScript) and backend (PHP) checks.
- * Integrated plugin into the WordPress dashboard with custom admin menu for form settings and entries management.
- * Used shortcodes to allow easy form embedding on any page or post.
- * Followed WordPress coding standards and plugin development best practices for compatibility and scalability.

Personal Portfolio Website | *HTML, CSS, JavaScript*

- * Designed and developed a responsive personal portfolio website using HTML5, CSS3, and JavaScript to showcase skills, projects, and resume.
- * Implemented smooth scrolling, interactive navigation, and project filtering to enhance user engagement.
- * Integrated contact form with validation and email support using mailto: or third-party services (e.g., Formspree/EmailJS).
- * Applied responsive design principles and media queries for mobile, tablet, and desktop compatibility.
